Discover the Power of Treeno Document Management Solution

Client documents, vendor documents and AP documents can be a click away with TreenoConnect for Microsoft Dynamics GP. Treeno is an easy-to-use and extremely powerful integrated document management system that enables organizations to capture, organize and share any type of digital or paper-based document within a secure, central repository. System deployment is effortless, document retrieval is instant, integration with existing applications is seamless and the Treeno system can scale to support as few or as many users as your organization requires. Treeno empowers you to improve client satisfaction through streamlined operations, improved efficiency, reduced costs and simplified audit preparation.

Integration with Microsoft Dynamics GP

TrenoConnect supports automatic filing to an electronic folder where the file is automatically labeled and identified by key words available from the integrated screen.

Users can scan to an inbox, view the file in the Treno Viewer, enter or review the document against the Microsoft Dynamics GP screen for automatic naming, routing and filing.

Users can drag-and-drop electronic files and emails to the TrenoConnect Index button for auto-filing them to the Microsoft Dynamics GP transaction

The TrenoConnect Search screen allows a authorized user to be on an integrated screen and automatically authenticate, search, retrieve and display the associated scanned documents and electronic files.

Treno provides users the ability to search via Treno Search tools to retrieve documents without having to log into Microsoft Dynamics GP. This allows the documents to be accessed by authorized users without having to be a user of the Microsoft Dynamics GP system.

Integrate documents at the Payable Transaction Entry Screen, GP Payable Payment Zoom, and GP Receivable Transaction Entry and GP Transaction Entry screens

Document Workflow and Reporting

Treno Workflow routing tool allows for documents to be stored securely and electronically notify users when it is their turn to work the file.

Treno Workflow reporting allows an organization to manage the people and the process while identifying bottlenecks, level loading work to ensure a positive customer experience.

Ensure Document Integrity and Security

Treno EDM stores all of your information in a highly secure repository and includes a comprehensive audit trail. Treno customers can eliminate any possibility that documents stored in their system will be altered without detection, ensuring undisputed authenticity of records.

Disaster recovery is also greatly improved, as items previously managed via fax, mail, and other paper means are now stored in the Treno repository. With Treno EDM, documents of all types can be backed up in a secure manner and are protected from theft, accidental loss, or destruction.
